Dear Chairman Little,

Why do we believe APS is seeking these changes? Simply because they have the political power to do so. They are not in the best interests of the customers or even the nation! The best hope for our future together is to develop all possible forms of energy--especially the readily available (especially in Arizona) solar energy. We will not be able to attend the public meeting, but want to register our VERY strong vote against the projected changes planned by APS and all members of the Arizona Corporation Commission who seek to facilitate them!!!!

Sincerely,

Dear Chairman Little,

Arizona should be leading the nation in solar power; we have sunshine 325+ days out of the year. I am considering purchasing solar panels, as I would like to see my APS bill decrease while helping the environment. People living in Arizona, or any where else in the USA, should not be penalized for wanting to use alternative energy sources.

Please do not allow any rate hikes or discriminatory fees by APS, and please do not let APS eliminate its solar policy.

Sincerely,

Jo Anne Barksdale

Mr. Chairman:

As an APS ratepayer and Sun City Resident, I strongly object to the APS recommendation for Mandatory Demand Charges.

With this mandatory demand charge, it could produce radically different charges every month. All of a sudden we would have spiked our kilowatt usage way up from what it normally is for a short period of time, but yet we are going to get stuck with a larger bill for that. I don't think that's right.

Residential demand charges are currently available as a choice. That is exactly where they belong.

Please vote against Mandatory Demand Charges.

Respectfully submitted,
